

Cyberdefense XDR

Managed extended detection and response

Today, everybody is the target of successful cybercrime business models and the average cost of a single incident has climbed to EUR 2 million for a 500-strong company. The inability of a traditional detection technology to detect advanced attacks has resulted in more than 200 days needed to detect a breach.

24x7 Prevention

24x7 Monitoring

24x7 Response

24x7 Peace of mind

Reduce 200 days to mere minutes

By deploying 24x7 managed security monitoring, incident detection, and incident response services, you can reduce these 200 days to minutes, and respond in time to contain or completely prevent a catastrophic breach. Conscia Cyberdefense XDR is a fully integrated solution that provides you with incident detection and response capability, based on the technology vendor of your choice.

Your preferred technology combined with our expert team

Conscia Cyberdefense XDR uses your preferred security technology to deliver advanced managed services. By integrating the features of the Microsoft or Palo Alto Networks security stacks with our SOC platform and expert team, we maximize your license investment, while providing state-of-the-art detection and response services.

True cooperation and cost-optimization

Our goal is to act as a seamless extension of your security team: achieving a high level of cooperation, without imposing any significant workload. The outcomes of our service will provide you with knowledge to optimize your security investments – based directly on our feedback from your risk environment.

Conscia Cyberdefense XDR Services

Conscia Cyberdefense XDR services provide the following core managed capabilities:

- 24x7 security monitoring, triage, and investigation.
- 24x7 active threat hunting.
- 24x7 on-demand incident response services.
- 60-minute time-to-detection and time-to-response SLA for critical events.
- Continuous vulnerability assessment to help your IT department efficiently remediate critical risks.
- Prioritization of analysis and notifications based on customer-specific business impact.
- On-premises and cloud asset coverage.
- Expertly-evaluated incident notifications.
- Expertly-curated monthly reports with security improvement recommendations.
- Access to a customer portal.
- Data source and false positive tuning.
- Weekly or flash threat reports on emerging threats.
- Integration with service desks and ticketing.
- Management of your security platforms.
- Long-term data retention.

Grow at any time

Whenever you need to increase the scope of your risk management, we are ready to extend our defensive cloak. You can easily upgrade to Conscia Cyberdefense Enterprise service to enjoy the following additional capabilities:

- Vertical-specific detection solutions for financial, industrial/manufacturing, and healthcare environments.
- Managed red teaming and penetration testing.
- Data leakage detection of your sensitive documents and credentials on the dark and clear web.
- Reliable response automation to accelerate preventive activity.
- Incorporating your network defenses, applications, and other data sources into the security monitoring service.

Conscia Cyberdefense XDR Technology Stacks

Microsoft

- Defender for Endpoint
- Defender for Identity
- Defender for Office365
- Cloud App Security

or

Palo Alto Networks

- Cortex XDR Pro
- Next Generation Firewall
- Cortex Data Lake
- Prisma SaaS

We support both full or partial technology stacks listed above.

Why choose Conscia?

- **Decades of expertise** culminating in our analysis and research team
- **Extensive proprietary library of attack detection rules** extending vendor offerings by 50% or more
- **SANS GIAC-certified team and ISO 27001-certified facilities** and processes
- **Country-local presence** of security experts
